### CML Wins Latest Supply Contract

A 2 year contract has just been agreed which will see CML supply a composite materials package to NPL a Nuneaton based composite manufacturing company.

This project will see CML's composite materials being used in the leading innovations and developments from within the automotive, autosport and aerospace industries.

Composite Tooling materials can be used to create bespoke manufacturing solutions to many industries. The Tooling board materials are easy to shape and machine and have excellent mechanical properties.

John Miller, Director at CML said 'I am delighted to confirm our latest venture with NPL. It will be exciting to see our materials being used in the design and manufacture of composite components across this wide range of market sectors.

CML is one of the UK's leading manufacturers and suppliers of carbon fibre and composite based solutions to F1 motor sports, automotive and aerospace industries.
