

Press Release

Customer Service on the Web

CML is going through an exciting phase of development and are pleased to announce the launch of their brand new website.

The new website will feature information on the CML product range from Composite Tooling and Pre-Impregnated Materials to Reinforcements and Adhesives. A new section will see technical data downloads available for key product ranges.

John Miller, Sales Directors said, 'We have spent a lot of time creating the new site so that we can improve information provision to customers. I'm sure that our data downloads will be popular with our customers - it really is the quickest way to obtain data on our range of products.'

The new website is available now at www.compositematerialsltd.co.uk

CML is one of the UK's leading manufacturers and suppliers of carbon fibre and composite based solutions to F1 motor sports, automotive and aerospace industries.
